Editorial Freedom at The IJOEM

*The IJOEM* is an international peer-reviewed journal which will publish articles relevant to epidemiology, prevention, diagnosis, and management of occupational and environmental diseases. It will also cover work-related injury and illness, accident and illness prevention, health promotion, health education, the establishment and implementation of health and safety standards, monitoring of the work environment, and the management of recognized hazards. *The IJOEM* adheres to the World Association of Medical Editors (WAME) Policy on “The Relationship between Journal Editors-in-Chief and Owners” available at www.wame.org/resources/policies#independence. More specifically, the Editor-in-Chief has editorial independence and as such has full authority over the journal's editorial content including how and when information is published. Editorial decisions are based solely on the validity of the work and its importance to readers, not on the policies or commercial interests of the owner.

*The IJOEM* is the official journal of the National Iranian Oil Company (NIOC) Health Organization. The NIOC Health Organization—established as an independent entity—provides health and medical services to the population, including to NIOC employees and their families. Neither the NIOC nor the NIOC Health Organization interferes in the evaluation, selection or editing of individual articles, either directly or by creating an environment in which editorial decisions are strongly influenced.
